HEATING OIL SOLUTIONS!

MESSAGE FROM THE BROTHERS

After the extreme 2014-2015 winter everyone got a nice break this year with the warm temperatures (2nd warmest winter on record) and lower prices. Many of our Budget and Prepay customers are left with a good size credit balance on their accounts. With that extra money, why not update your heating system which can save you money through greater efficiency for years to come. Our service department would be happy to give you a FREE estimate.

Speaking of our Service Department, we welcome Kevin Hartigan as our 2nd service technician to provide even faster service for our customers. Kevin has over 10 years of experience and has been a good addition to our team. Kevin also has air conditioning experience for anyone looking for an A/C Tune-up or service.

We are always looking to improve and provide our customers with better service. Your suggestions and feedback is always welcome. Thank you for your continued business, we greatly appreciate it.

EASY PAY PLANS

We love Massachusetts for all its beautiful seasons, but let's face it our winters can get mighty cold! You certainly make good use of your home heating equipment to stay toasty warm while outside temperatures drop to frigid lows, and as a result, your energy costs can easily spike as your fuel usage increases and you need multiple deliveries in a month. But with our **Easy Pay Cap program**, you can avoid this unpredictability. **Easy Pay Cap** makes your life easier by controlling your heating oil expenses and deliveries for you with **protection option**.

Our **Easy Pay Cap Price** option sets a ceiling on how much you can be charged for a gallon of fuel regardless of market increases. Your price will never rise above the cap price, and when market prices fall below the cap, **you pay the lower price!** Not only do we help you control costs, but we also make it easier to manage payments. With **Easy Pay Cap**, you get flat monthly payments, so you can plan your monthly expenses the way *you* want to. In addition, **Easy Pay Cap** includes automatic fuel delivery with a no run-out guarantee, so you'll never have to monitor your fuel levels or call us to refill your tank; we'll do it for you. **Call today to enroll in Easy Pay Cap.**

WEBSITE SERVICES

Harrington Oil, Inc website has become quite a hit. As an oil buying customer you can access your personal account balance, see your last delivery and service performed, along with capability of paying your bill. Continue to visit Harringtonoilinc.com for new updates.

AUTOMATIC DELIVERY Vs. WILL-CALL **As an Automatic Delivery customer:**

-  • You can rest, knowing that Harrington Oil has your fuel deliveries on track.
-  • You never have to monitor your fuel tank.
-  • You never have to call to schedule delivery.
-  • You don't even have to be home to accept delivery.
-  • You can take advantage of our Easy Pay Cap Plan

As a Will-Call customer:

-  • You're in charge of your home's fuel supply, but with great power comes great responsibility...
-  • You must keep track of your tank level and call for each delivery.
-  • You must schedule delivery several days before your tank runs dry.
-  • Running out of fuel after hours can put your house and family at risk.
-  • If you run out of fuel you may incur additional charges

GET WITH THE PROGRAM

Consider investing in a programmable thermostat to maximize energy efficiency. Thermostats should be set to 8 degrees lower than normal at night or when no one is home. Some utility companies provide programmable thermostats for free or offer rebates, so it might be worth calling your energy provider before heading to the store.

THAT IS THE QUESTION

After a long winter, most heating systems require some attention from our certified technician, but how can you tell whether a repair or a replacement is in order? To make your decision a little easier, please refer to this chart:

To find out for sure whether your system needs to be repaired or replaced, call Harrington Oil, Inc.'s experts at 508-829-0044

REPLACE

- If your equipment requires multiple service calls per season
- If your boiler or furnace is more than 15 years old
- If the cost of repairs exceeds 40% of the cost of replacement.

OR

REPAIR

- If it has been a year or more since your system's last maintenance call
- If your equipment is working normally except for the noise its making
- If the repairs your equipment needs are covered by manufacturer warranty.

As an added incentive, Rebates and Tax Incentives are still being offered for replacement of heating systems and hot water heaters. Please refer to <http://www.masssave.com> for complete information.
