HEATING / COOLING SOLUTIONS!

**MESSAGE FROM THE BROTHERS**

It was an interesting winter season to say the least. With extreme cold settling in for several weeks at the end of December into early January, followed by a very mild February into the weekly snow storms of March and extended cold temperatures in April.

While every winter season offers a few challenges, Harrington Oil works extremely hard to minimize those challenges and keep our customers warm and comfortable.

Speaking of keeping your home comfortable, we also service and install Air Conditioning systems; from Central Air systems for the whole house to mini split systems for just a couple of rooms. If you already have an Air Conditioning system make sure to have it tuned up to keep it running at peak efficiency.

Be it during the summer heat or winter cold Harrington Oil is always here to help keep your home comfortable. We thank you for your business and will continue to work hard to reward the trust you have placed in us. Have a Safe and Happy Summer!

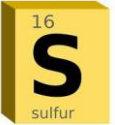

**BE COOL THIS SUMMER**

A new Air Conditioning system will help keep you cool all summer long. With a Fijitsu mini split system you can just cool the room(s) you use the most rather than the whole house. Call today for a FREE estimate. We offer a 1 year warranty on all of our installs. We are happy to provide 0% financing for credit approved customers.

**HEATING OIL TRANSITIONS TO ULTRA- LOW SULFUR FUEL**

On July 1, 2018 all heating oil sold in Massachusetts and the 5 other New England states will become ULS – ultra-low sulfur content fuel – transforming heating oil into a cleaner, more efficient energy choice for the region.

ULS heating oil and traditional heating oil are petroleum products distilled from crude oil. ULS heating oil has only 15 parts per million (ppm) sulfur content. Prior to 2014, traditional heating oil sold in Massachusetts had up to 3500 ppm sulfur content, but because of air quality laws and regulations supported by the region’s heating oil industry, refineries have been gradually producing a cleaner fuel through a process called hydro-desulfurization that removes almost all the sulfur. ULS heating oil requires no modifications to existing heating systems.

For more information on ULS heating oil go to [WWW.MassEnergyMarketing.org](http://WWW.MassEnergyMarketing.org)

**DON'T TUNE OUT YOUR TUNE-UPS**

Most people would like to think about their heating & cooling systems as little as possible. But if you don't keep it maintained eventually you will be thinking about much more. You wouldn't skip the maintenance on your vehicle. Much like your vehicle, your heating & cooling system is a mechanical system with moving parts and pieces that need to be cleaned, inspected and adjusted. Just like your vehicle all of these parts and pieces will wear out with use and age.

## SO MANY OPTIONS TO SERVE YOU

After two previous years of mild winters, extreme cold caught many energy users off guard. Increased usage and equipment failures due to the cold, combined with the ups & downs in energy prices impacted household budgets just after the holidays. To help you prepare for the next winter, we want to remind customers of all the products and services we offer to keep you warm and cozy within your budget.

## PRICING PLANS

Harrington Oil has been offering price protection plans for years. A price protection plan is the best and easiest way to protect your energy budget. Harrington Oil offers two options for our oil customers:

**Monthly Budget Plan:** Based upon your annual consumption and the capped price, you can spread your payments out over several months.

**Prepay Plan:** Based upon your annual consumption and our most current Capped price you can pay your entire bill upfront and have "Peace of Mind".

Harrington Oil, Inc.  
PO Box 563  
Holden, MA 01520

## SERVICE PLANS

The extreme cold we experienced in January pushed many heating systems to the limit. A heating system breakdown when temps are well below zero means more than just inconvenience; it represents a real danger to your family and property.

All service plans from Harrington Oil include an annual tune-up to keep your system running at peak efficiency and to help head off problems. Should something break, you have the assurance that our service department is available 24/7/365 for emergency repairs.

We have two service plans to choose from. You never know what this winter is going to bring. If interested in a Service Plan, call for more information.

## SUMMER OFFICE HOURS

Summer hours from April through October are Monday through Friday 7:30 am to 4:30 pm. Should you need to contact us during non-business hours, please feel free to visit our website at [www.harringtonoilinc.com](http://www.harringtonoilinc.com). We offer a secure internet connection for ordering oil or emailing a staff member with questions on your account. Your emails will be responded to promptly on the next business day.

Phones are answered 24 hours a day by a Harrington Oil employee to handle any **emergencies**. Please phone during normal business hours with any questions on billing or account information.
